To Whom It May Concern:

At first I was not 100% convinced that Centron would live up to its claims. But, after seeing first hand how well the Centron really works, I am a complete believer in this all in one additive.

Centron is not only saving our company fuel, it is a great lubricant for ULSD, detergents clean the fuel system and injectors, and moisture inhibitors remove water and algae.

Clint Braunel and Kurt Braunel have performed all of the emissions testing with EPA approved equipment, and Centron has reduced our fleet's emissions by 50% or better. We have also noticed less maintenance costs and increased horsepower. The drivers find the product very easy to use with either the pre-measured one gallons or the on-board additive dosing system.
